

AGENT 1 — EVENT ENGINE

Webinar Funnel Agent

Your Core Revenue Machine — Running 24/7 on Autopilot

WHAT THIS AGENT DOES:

Fills your webinars with the right people,
follows up automatically, and converts
attendees into booked sales calls — 24/7.

PREPARED FOR

Randy Wimmer

Government Contracting Academy / ISO Certification Group

Automated

Zero manual work

24/7 Active

Works while you sleep

Fully Tracked

Every click measured

WHAT IS AGENT 1?

Agent 1 is the heart of your entire revenue system.

It takes a complete stranger — someone who saw an ad or received an email — and walks them through a structured journey until they're sitting on a booked call with you, ready to hear about ISO certification. No manual follow-up. No missed leads. No forgetting to send reminders. It runs 24/7.

WITHOUT AGENT 1	WITH AGENT 1
✗ Manually send every follow-up ✗ Registrants forget to show up ✗ No-shows never hear from you again ✗ No replay sent automatically ✗ Inconsistent call bookings	✓ All emails fire automatically ✓ T-24hr → T-3hr → T-15min reminders ✓ No-show replay sequence fires instantly ✓ Re-engagement sequence built in ✓ Every email has a call-booking CTA

WHAT IT TARGETS

40%+	3–5	11	\$0
Show-Up Rate Target	Calls Booked Per Webinar	Emails + SMS In Sequence	Extra Tools Needed

THE 7-STAGE JOURNEY

Every person who registers goes through this exact automated journey — from clicking 'Register' to booking a call with you.

1

TRAFFIC

People discover the webinar via LinkedIn ads, organic posts, email campaigns, or direct outreach. Every channel points to one place — the registration page.

2

REGISTER

They land on a clean registration page built in GoHighLevel on fedgovstartup.com. Name, email, phone captured instantly. Lead enters Randy's CRM automatically.

3

CONFIRM

Instantly after registering: confirmation email, Zoom link, lead magnet download, and a calendar add button (Google / Apple / Outlook). They feel welcomed and prepared.

4

NURTURE

2–3 emails over the next few days build trust and anticipation. They arrive at the live webinar already knowing who Randy is and why it matters to their business.

5

WEBINAR

Randy delivers the live session on Zoom. The system (n8n) tracks exactly who attended and who didn't. This triggers two completely different follow-up paths automatically.

6

FOLLOW-UP

Attendees get a post-webinar sequence. No-shows get a replay + recovery sequence. Every email in both tracks has one goal: get them to book a call with Randy.

7

CALL BOOKED

The lead clicks Randy's Calendly link and books a 30-min call. They enter the sales pipeline as a warm, educated, pre-qualified prospect ready to hear about ISO certification.

THE AUTOMATED EMAIL + SMS TIMELINE

Every message below fires automatically. Randy only needs to show up for the live webinar. Everything else — confirmation, reminders, follow-up, replay — is handled by the system.

* No-shows receive a separate replay + re-engagement sequence — see next page.

WHAT HAPPENS AFTER THE WEBINAR

This is where most businesses lose leads. Agent 1 handles every attendee and every no-show with a separate, targeted automatic sequence.

No lead gets left behind. Whether someone attended or missed the webinar entirely, Agent 1 has a sequence built specifically for them. Every registered lead stays in the funnel until they book a call — or choose to unsubscribe.

THE 5 PLATFORMS POWERING AGENT 1

GHL	GoHighLevel The command center. Hosts the landing page, captures leads, sends all emails and SMS, manages the pipeline, and handles call booking. Everything lives here.	■ Already subscribed \$97/month
ZOOM	Zoom Webinars Delivers the live webinar. Records automatically for replay delivery. After the session ends, attendance data is pulled and pushed into GHL automatically.	■ Already subscribed Existing plan
n8n	n8n Automation The invisible connector. After the webinar, n8n pulls who attended vs who didn't from Zoom and tags them in GHL — triggering the right follow-up sequence.	■ Free (open-source) FREE
SG	SiteGround Hosts fedgovstartup.com. DNS records (SPF / DKIM) are set up here so all emails from GHL land in the inbox — not the spam folder.	■ Already subscribed Existing plan
CAL	Calendly Randy's call booking page. Every CTA email links here. Leads book directly, it syncs with Randy's calendar, and sends automatic reminders to both parties.	■ Already set up Free tier

RANDY — YOUR 5-ITEM CHECKLIST TO GO LIVE

01	Confirm the first webinar topic Recommendation: (a) Get On Contract Vehicles Without Extensive Past Performances!	■
02	Pick the first webinar date + time Choose a date 2–3 weeks out. Bi-weekly cadence going forward.	■
03	Confirm GHL sub-account setup BrndGuru needs admin access inside your GHL account to start building.	■
04	Verify Zoom Webinar license Confirm it's a Webinar license — not just a Meetings license (they're different).	■
05	SiteGround DNS access confirmed BrndGuru sets up SPF/DKIM records so all emails land in the inbox, not spam.	■

Once all 5 items are confirmed, BrndGuru begins building immediately. Target: Agent 1 live within 14 business days.

AGENT 1 — TECHNICAL WORKFLOW & TRIGGER MAP

Full automation trigger map — every step, every tool, every API action. For implementation reference.

#	TRIGGER	TOOL	ACTION / OUTPUT	→ FIRES NEXT
T1	Form Submit (GHL landing page)	GoHighLevel	Contact created → tagged 'webinar-registered' → pipeline stage 'Registered'	Zoom API: register contact Start Confirmation Workflow
T2	Workflow Start (Instant)	GoHighLevel	Email: confirmation + Zoom join link + lead magnet PDF SMS: 'You're in! Here's your link → [Zoom]'	Wait +24 hrs → T3
T3	Wait: +1 Day	GoHighLevel	Email: Authority content — GovCon insight to build trust and anticipation before webinar	Wait +2 days → T4
T4	Date Trigger -3 days before	GoHighLevel	Email: Agenda preview + quick win tip to prime attendees and raise show-up intent	→ T-24hr date trigger
T5	Date Trigger -24 hours	GoHighLevel	Email: Full reminder + Zoom join link + 'Bring your top question'	→ T-3hr date trigger
T6	Date Trigger -3 hours	GoHighLevel	Email: Day-of reminder — single bold 'Join the Webinar' button, no distractions	→ T-15min SMS trigger
T7	Date Trigger -15 minutes	GoHighLevel	SMS: 'Starting in 15 min! Tap to join → [Zoom link]'	→ Live webinar runs
T8	Zoom Webhook webinar_ended (POST)	n8n + Zoom API	n8n receives webhook → GET /past_webinars/{id}/attendees from Zoom API Loop all registrants: attended? → GHL PATCH tag 'attended' : PATCH tag 'no-show'	GHL tag fires T9 or T10 branch
T9	GHL Tag Applied 'attended'	GoHighLevel	+1hr: replay + Book-a-Call CTA +24hr: follow-up email +48hr: urgency +72hr: bootcamp offer (if no booking yet)	Every email CTA → Calendly link
T10	GHL Tag Applied 'no-show'	GoHighLevel	+1hr: replay delivery Day 2: re-engagement Day 5: book-a-call nudge Day 7: invite to next webinar	Every email CTA → Calendly link
T11	Calendly Webhook booking.created	Calendly + GHL	Tag 'call-booked' applied → pipeline stage 'Sales Call Scheduled' → confirmation + calendar invite sent to both parties	→ Sales pipeline (Agent 2 takes over)

n8n AUTOMATION: ZOOM → GHL NODE FLOW (T8 Detail)

GHL Pipeline tag → GoHighLevel Automation fires within seconds of webinar end
Both tags instantly trigger a separate GHL automation workflow

DNS & EMAIL DELIVERABILITY SETUP (SiteGround / fedgovstartup.com)

Record	Type	Host	Value	Purpose
SPF	TXT	@	v=spf1 include:sendgrid.net ~all	Authorises GHL (SendGrid) to send from domain
DKIM	CNAME	em._domainkey	em.domainkey.[GHL-ACCOUNT-ID].sendgrid.net	Cryptographic sender authentication
DMARC	TXT	_dmarc	v=DMARC1; p=quarantine; rua=mailto:postmaster@fedgovstartup.com	Quarantine unauthenticated email
MX	MX	@	mail.fedgovstartup.com (existing — do not change)	Inbound email — verify before changing

■ BrndGuru configures all three DNS records. Randy only needs to grant SiteGround cPanel / DNS zone access.
